

Introduction

The Product

The Speedster/VX 220 introduces a two-seater sports car to the model range. A major feature of the vehicle is the use of aluminium alloy and glassfibre composite materials in many structural parts of the vehicle.

Active safety

- Tyre characteristics are specific to each axle.
- Independent suspension at the front and rear.
- Anti-lock brake system (ABS).
- Ventilated disc brakes at the front and rear.
- Third brake lamp.

Passive safety

- Driver's airbag.
- Three-point seat belts with pyrotechnic tensioners for driver and passenger.
- Energy absorbing structures at the front, sides and rear of the vehicle.
- Roll bar.
- Fuel tank located within a crossmember at the middle of the vehicle.
- Fuel cutoff impact switch.
- Fire extinguisher is optionally available.

Driving comfort

- Removable soft top or hardtop.
- Bucket-type seats.
- Driver's seat with longitudinal adjustment and lumbar support.
- Passenger's seat with longitudinal adjustment is optionally available.
- Shoulder pads for the seat belts are optionally available.
- Footrest for the passenger is optionally available.
