

## General

Essential components of the OPEL / VAUXHALL wiring harness repair system include the introduction of the following new features:

### For repairing cables

- Crimping tools for removing insulation from cables and crimping cable connectors.
- Cable connectors for producing connections between two cables.
- Shrink-down plastic tubes as insulation and corrosion protection for connections.

### For replacing spring contacts or wiring harness plugs

- Release tools for detaching cables from wiring harness plugs.
- Wiring harness plugs with lead ends for replacing individual spring contacts or complete wiring harness plugs.
