

## Restrictions

For the following systems and wiring harnesses, repair is not allowed:

- Shielded lines/coaxial cables for anti-lock brake system/anti-skid control system, radio, telephone, motor, anti-theft warning system, for example. An exception to this rule are CAN-bus wires, they can be repaired as given in chapter Step D6 - Perform Repair
- Airbag and pyrotechnic seat belt tensioner system
- Electronically controlled throttle valve
- Power steering system
- Electrical seat adjustment
- High-voltage live cables (e.g. ignition system, xenon lamp)

**Note:** In single cases, within the framework of field remedies, deviations to these rules can be made.
