

Step E - Final Operations

E1 - Assemble vehicle

- If possible, perform step E2 before assembling the panelling.
- Secure wiring harnesses at original location with original parts, e.g. corrugated tube, wiring trough brackets, cable ties, clips, etc.
- Re-attach panelling and attaching parts.

E2 - Perform function check

- Connect battery.
- Perform function check. This ensures that the wiring harness repair has been performed successfully.

E3 - Program volatile memories

- After completing all operations, reprogram volatile memories and clear audio equipment using code.
