

Foreword to Chassis Alignment Values for Model Year 2002

This "Chassis Alignment Values" brochure for Opel/Vauxhall vehicles has been specially created for use on the chassis alignment unit and contains all important information which is required for the correct performance of chassis alignment.

This brochure contains the chassis alignment values for the following Opel/Vauxhall vehicles for Model Year 2002:

Agila, Corsa-C, Combo-C, Speedster/VX 220, Astra-G, Astra OPC, Astra-G Coupe, Astra-G Convertible, Zafira, Zafira OPC, Vectra-C, Omega-B, Frontera-B, Campo/Brava, Arena, Movano and Vivaro.

In order to visually accentuate the new values or values which have been altered in comparison with the old brochure, the values in these data fields are in bold type and underlined, see following example:

1° 45' ± 45'

Note: For Omega-B, a special adapter is required to fasten the wheel mirror or measurement sensor for chassis alignment in conjunction with vehicles fitted with the new light-alloy rims.
