

Paint Stages

The previously familiar painting stages I, II and III apply for painting individual parts.

For blend-in painting (blending system), painting stage II a applies. For touching-up (blending system), painting stage II b applies.

Painting stages II a and II b correspond to painting stage II. Blend-in painting / touching-up must only be carried out for 2-coat paint applications.

For more detailed information, refer to chapter "Paint Systems – Overview" and chapter "System 5, Top 2-coat base metallic for 2-coat paint applications".
